

The OSU Total Health and Wellness Team Based Care: The Future of Health Care

Purpose

Offered by the Ohio State College of Nursing, our Nurse Practitioner-led primary care practice provides a comprehensive range of services:

- Family practice care to individuals of all ages
- Health and wellness screening and education
- Evidence-based management of new health concerns
- Care and ongoing management of conditions such as diabetes, asthma, heart failure and others
- Mental health counseling and programs for conditions such as depression and anxiety

Impact

To provide quality, team based health care to the residents of the near east side of Columbus and surrounding communities.

To educate students, from multiple disciplines, on team based primary care.

To improve access to care and provide student experiences in caring for the under served.

Ohio State Colleges/Units Involved
College of Nursing

Community Partners Involved
Wexner Medical Center
University Hospital East
OSU Family Practice
